

Pulse: Top of the Stablecoin Stack

! The Stablecoin Yield Problem

- **Fragmented stablecoin yield farming** across multiple chains and protocols
- **Manual bridging** of USDC/USDT & APY hunting is time-consuming
- **Risk of bridging failures** and missed stablecoin opportunities
- Users crave **safe, predictable stablecoin returns**, not gambling

Stablecoin Market Opportunity

- **\$11 B** locked in stablecoin yield (↑ from \$1.5 B, Jan 2024)
- Growth driven by demand for **low-volatility stablecoin yield**
- Institutional & retail users want **hands-off stablecoin solutions**

Pulse's Stablecoin-First Approach

-  **One-Click Deposit** – deposit USDC/USDT... once
-  **Auto-Rebalancing** – contracts hunt best stablecoin rates
-  **Cross-Chain Optimization** – stablecoin capital flows where yield peaks
-  **Volatility Protection** – stablecoin-only vaults eliminate crypto volatility

Core Features

1. **Unified Stablecoin Dashboard** – live USDC/USDT balances & yields, multi-chain
2. **Cross Chain Routing Engine** – gas-efficient bridges + stablecoin vault aggregator
3. **Stablecoin Strategies** – set risk, target APY, drawdown limits
4. **Transparent Reporting** – on-chain logs & real-time PnL charts

Traction & Roadmap

Milestone	Status
Alpha Release	500+ users, \$2M TVL
Q3 2025	Mainnet launch + UX polish
Q4 2025	More stablecoin support (USDS, EURC...)

✨ Ready to Earn Stablecoin Yield Effortlessly?

Start now — deposit USDC/USDT and relax.
Pulse optimizes your stablecoin yield in real time.

 Thank You!
